

# U.I. Plan

## **1. Read More Button on Home Page**

This button will allow users to click to read more about Jack Johnson's Top 10 Plastic Free Tips. The user can also relick the button to hide the text if they want. Therefore, the result of the click toggles the 10 Tips.

## **2. Pop-Up Ad on Home Page**

The Pop-Up Ad is featured on the Home page, and only appears after the user scrolls down the page. Users are able to click out of the box and continue throughout the site as usual. After the pop up box has been clicked out of, the pop-up will not appear again unless the user refreshes the home page.

## **3. Accordion on Community Page**

This accordion displays three subheadings: Your Actions, Your Choice, and Your Voice. Users are able to click each subheading to interact with the accordion. The accordion shows how people can pledge and get involved within their communities. The user can also click again to hide the section if wanted. To show the subheadings are interactive, the background color changes while the user hovers over it and then also while the accordion is open.

## **4. Air Quality Index Number API**

This API is featured on the Community Page. The API displays Hawaii's current Air Quality Index Number. Additionally, there is some information on AQI numbers. I retrieved this API from <https://www.airvisual.com>.
